

IAEI Uranium Course

Casper, Wy Sept 14th - 18th

Wellfield Balancing

I. Advantages

- ❖ Minimizes the possibility of groundwater excursions.
- ❖ Can be used as an early indicator of well problems.
- ❖ Ore that is being mined can be accounted for more readily.
- ❖ Minimizes extraction plant fluid volume control

II Disadvantages

- ❖ Does not maximize flow through the extraction plant

Use monitor well peizometrics

Multi-completion wells

The benefits of singular screened zones vs. multi
Long interval completion. GPM is the important function.
